

Pathway to Savings™ Rewards program

Situation:

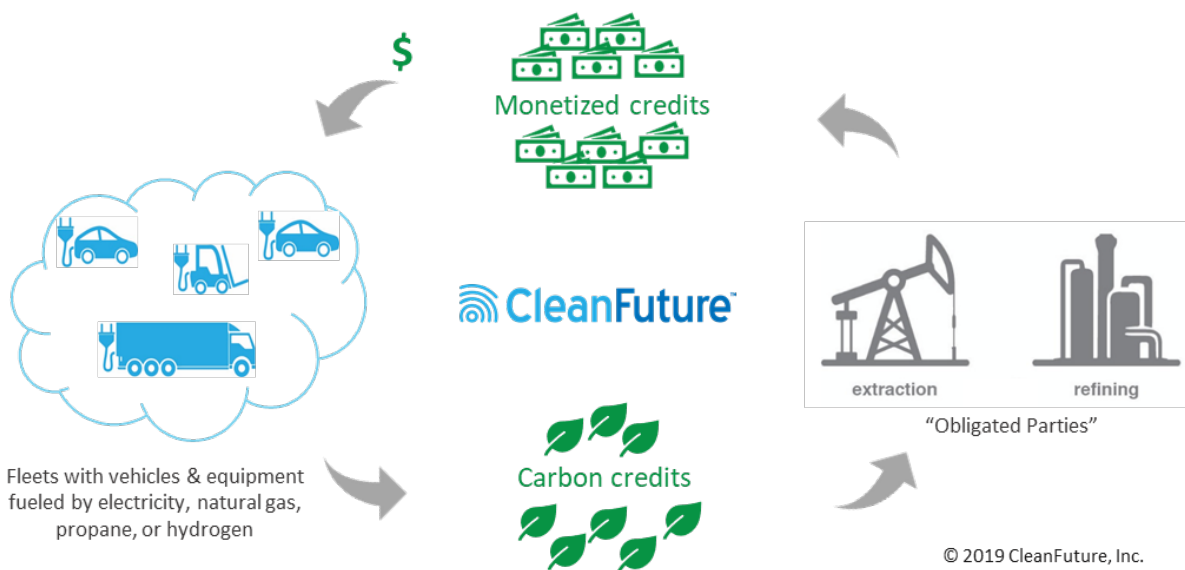

Organizations seldom take advantage of emerging financial incentives and regulatory credit programs for clean transportation or renewable energy.

Solution:

CleanFuture's **Pathway to Savings™** Rewards program unlocks dormant financial opportunities for fueling your fleet with clean fuels that otherwise goes unrealized.

Receive a quarterly rewards payment!

As a fleet owner/operator, you're contributing to a cleaner energy future by fueling your fleet with clean fuels. Receive quarterly **Pathway to Savings™** Rewards for electricity, natural gas, propane, hydrogen, or certain other qualifying fuels. By enrolling, organizations receive quarterly **Pathway to Savings™** Rewards for clean alternative fuels supplied as transportation fuels in California or Oregon.

Financial Opportunity:

CleanFuture pays your company each quarter for qualifying clean fuels supplied to your fleet. Rewards earnings will vary based on a market price and the amount of clean fuel supplied to eligible fleet assets.

Rewards earnings are paid each quarter for as long as your company operates eligible fleet assets while your company remains enrolled with CleanFuture's **Pathway to Savings™** Rewards program.
